Tips to Help You Get to Work On Time

- ◆ Plan your working day in advance. Prepare and organize everything you'll need for it the night before. This includes clothes, documents, food and meeting preparation.
- ◆ Set your alarm the night before and use it as a wakeup call. However, don't just put it right by your bed where you can just turn over and hit the snooze button when it goes off. Leave it on the other side of the room so that when it goes off, you'll have to get up to turn it off.
- ◆ Get up at least an hour before you're due to be at work. Even if you think you can be at work on time if you wake up half an hour before you're due in, it's better to be safe than sorry so leave plenty of time for unforeseen circumstances.
- ◆ Have breakfast and splash your face with cold water, this will help you function normally. A good healthy breakfast in particular will help energize you, making you complete the journey to work faster and more efficiently.
